# Major Global Issues

ARMADA

- Brexit – Will the UK survive this and what will it look like? Implications for the US
- New leadership in Latin America – Andres Manuel Lopez Obrador in Mexico, do we have a Chavez or Lula in AMLO? Who is Jair Bolsonaro and why is he called the Tropical Trump? How long for Maduro?
- Twilight for Germany's Merkel? Who replaces her as far as Europe is concerned? Rise of populist right throughout Europe.
- Saudi Arabia under a global cloud. Will Turkey or Iran take advantage?
- India makes move on Chinese market share as tariffs and trade wars alter the playing field

# Global Threats

ARMADA

## THREATS TO ECONOMIC GROWTH

Terrorism and cyber threats moved up; uncertain economic growth and exchange rate volatility moved down Figures in (%)

# Growth Up Slightly

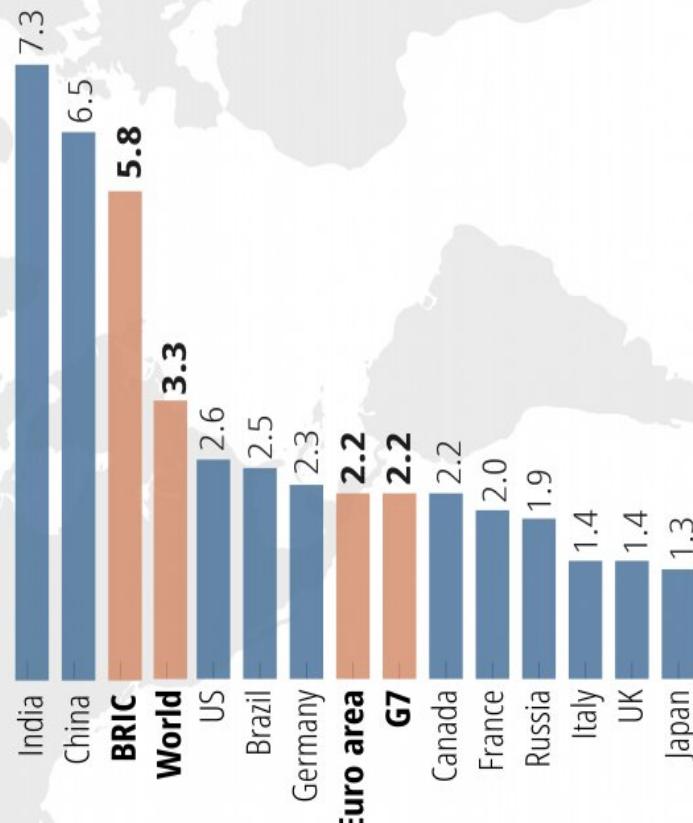

ARMADA

## GLOBAL ECONOMIC OUTLOOK

Analysts are upbeat on global economy thanks to strong fundamentals

### 2018 GDP Growth Forecasts

Annual Variation in %

■ Global growth is expected to remain strong this year, and risks to the economic forecast for 2018 are skewed to the upside.

■ Loose monetary conditions are supporting consumer confidence and capital expenditure.

■ Solid global economic dynamics are tightening job markets, which is reverberating positively in household spending.

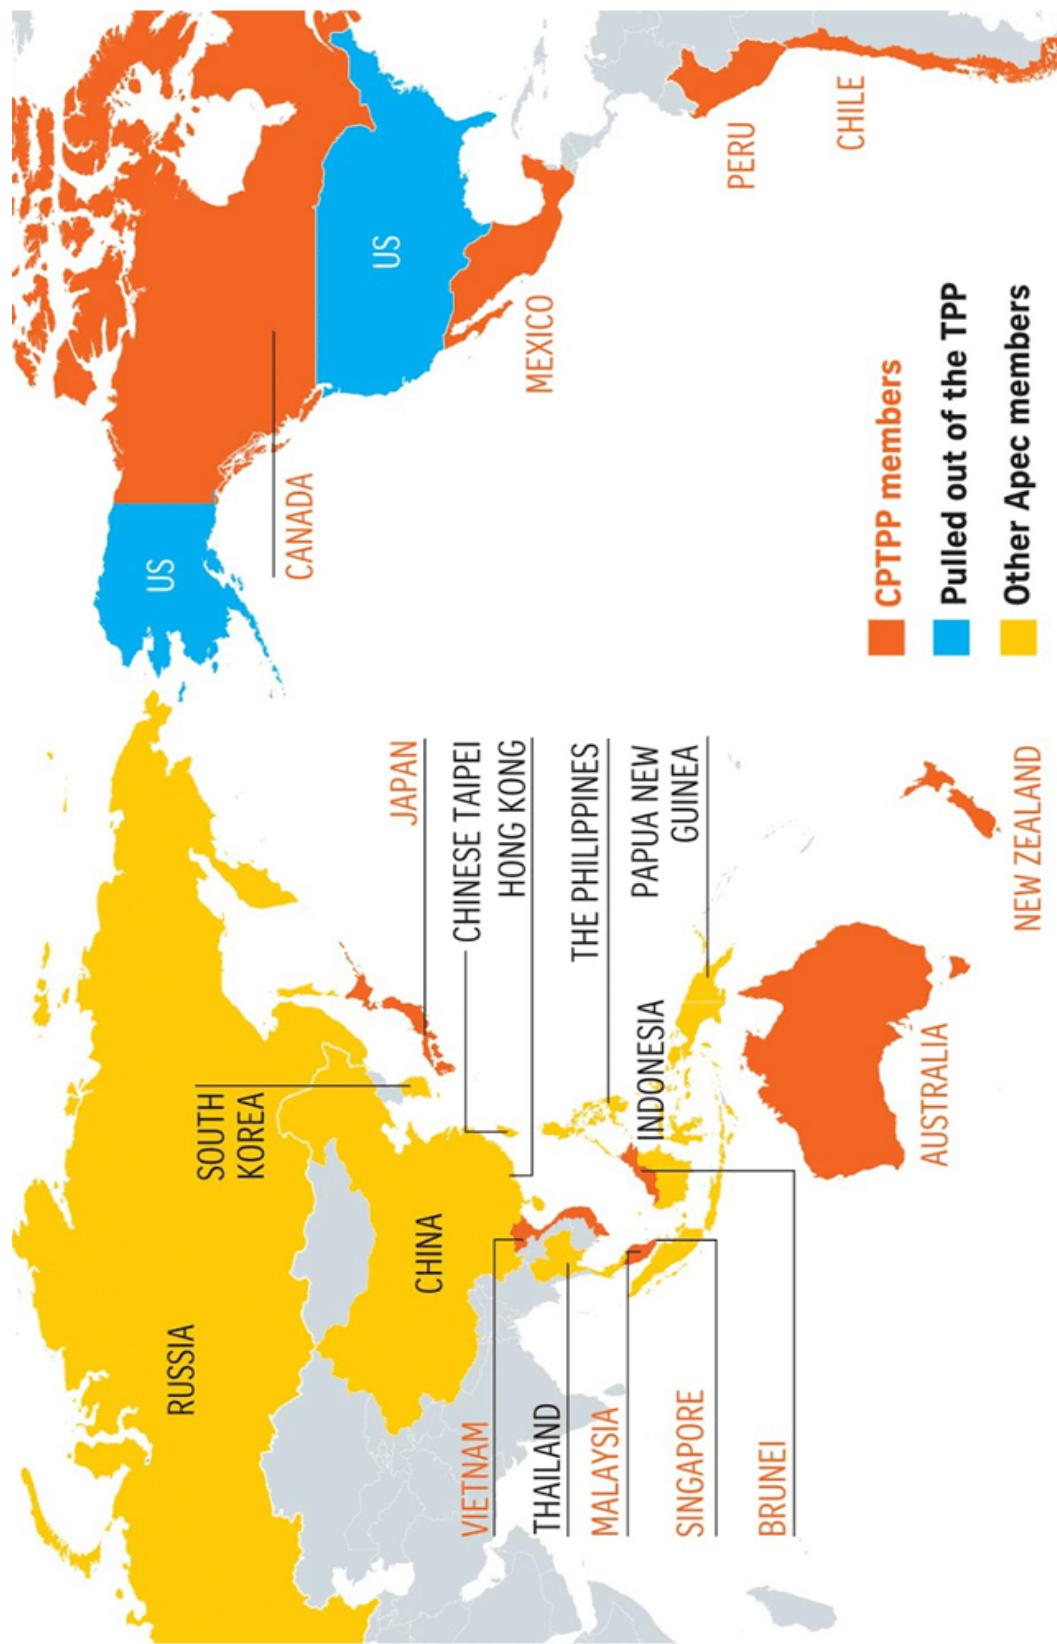

## FOCUS ECONOMICS

FocusEconomics Consensus Forecast Major Economies - February 2018 edition

# New Alliances

ARMADA

# Tariff Politics

ARMADA

- Issue Number One – In most every respect the US and China are enemies and have been for many years. Connected by mutual dependence.
- Issue Number Two – Bashing China is popular with Trump's base and bashing the US is popular in China.
- Considerations
  - China is the more directly vulnerable of the two as there are no real substitutes for the US consumer while the US can (and will) find alternative sources.
  - US impact will be indirect as countries that sell to China are the ones that buy from the US and will be slowed if China slows.
- Tariffs do not work at all if they are temporary. Companies will not invest in becoming a new supplier if they think the tariffs will be lifted later.

# Birth of the USMCA

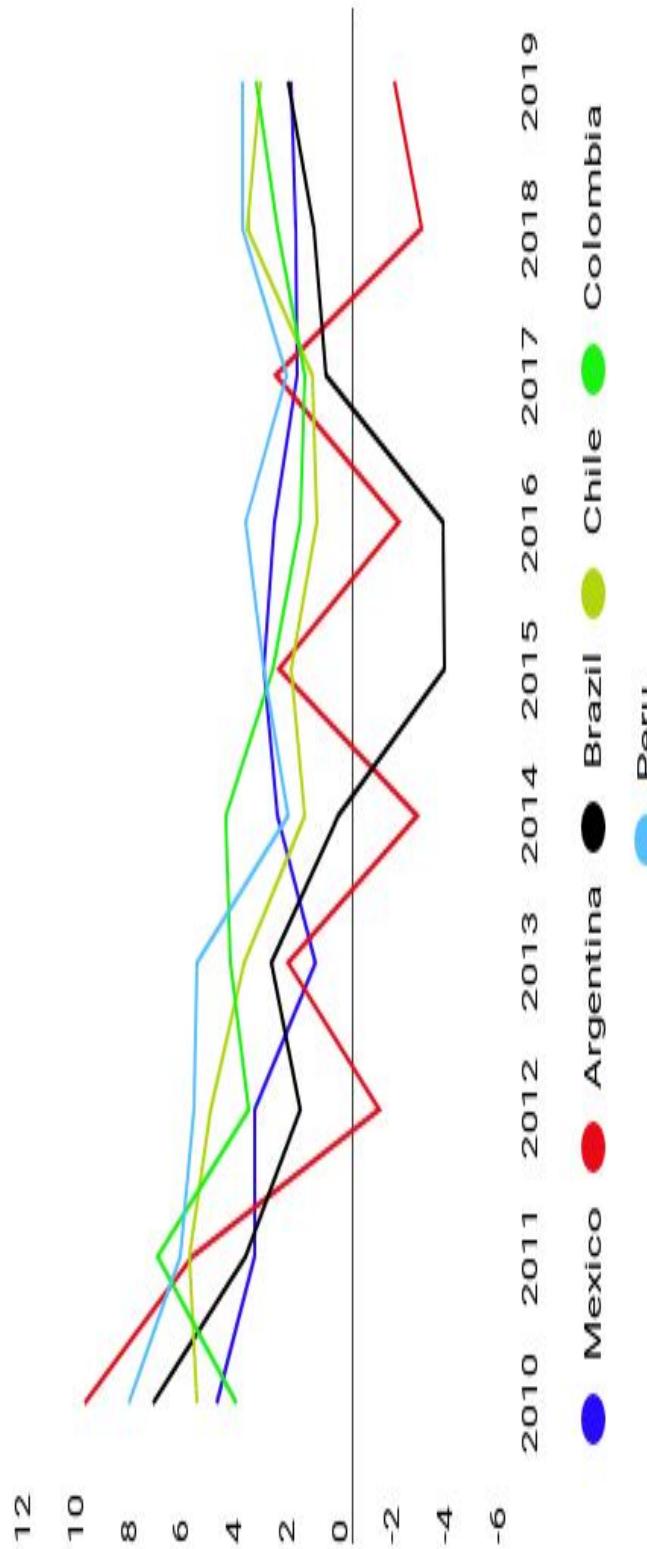

- **Nafta is Dead – Long Live Nafta**
  - Replaced by USMCA – try singing to the tune of YMCA
  - Now has to be approved and ratified by US Congress, Mexican Congress and Canadian Parliament
- **Three Sticking Points**
  - Auto sector – more US domestic content, higher wages demanded in Mexico, more assembly in US
  - Dairy Business – reduced Canadian subsidies to dairy and easing of restrictions on imported product from US
  - Dispute resolution – arbitrary threats from any against any member rejected – has to go to independent arbitration panel. This may have an impact on steel and aluminum tariffs

# Mexican Economy Compared

## Mexico's economy is resilient

The economy is expected to grow by 2.1 percent in 2018, and 2.3 percent in 2019.  
(GDP constant prices, year-on-year percent change)

# Not Many Surplus Readings

ARMADA

**World Map of U.S. Trade Balance  
Trade in Goods (in billions of dollars)**

**How to read this graph:**  
Countries in red colour show where U.S. has a trade deficit.  
Countries in green colour show where U.S. has a trade surplus.  
The size of the countries represent a higher or lower trade deficit/surplus.  
e.g. U.S. has the highest trade deficit with China and the highest trade surplus with Hong Kong.

# Steel Tariffs

ARMADA

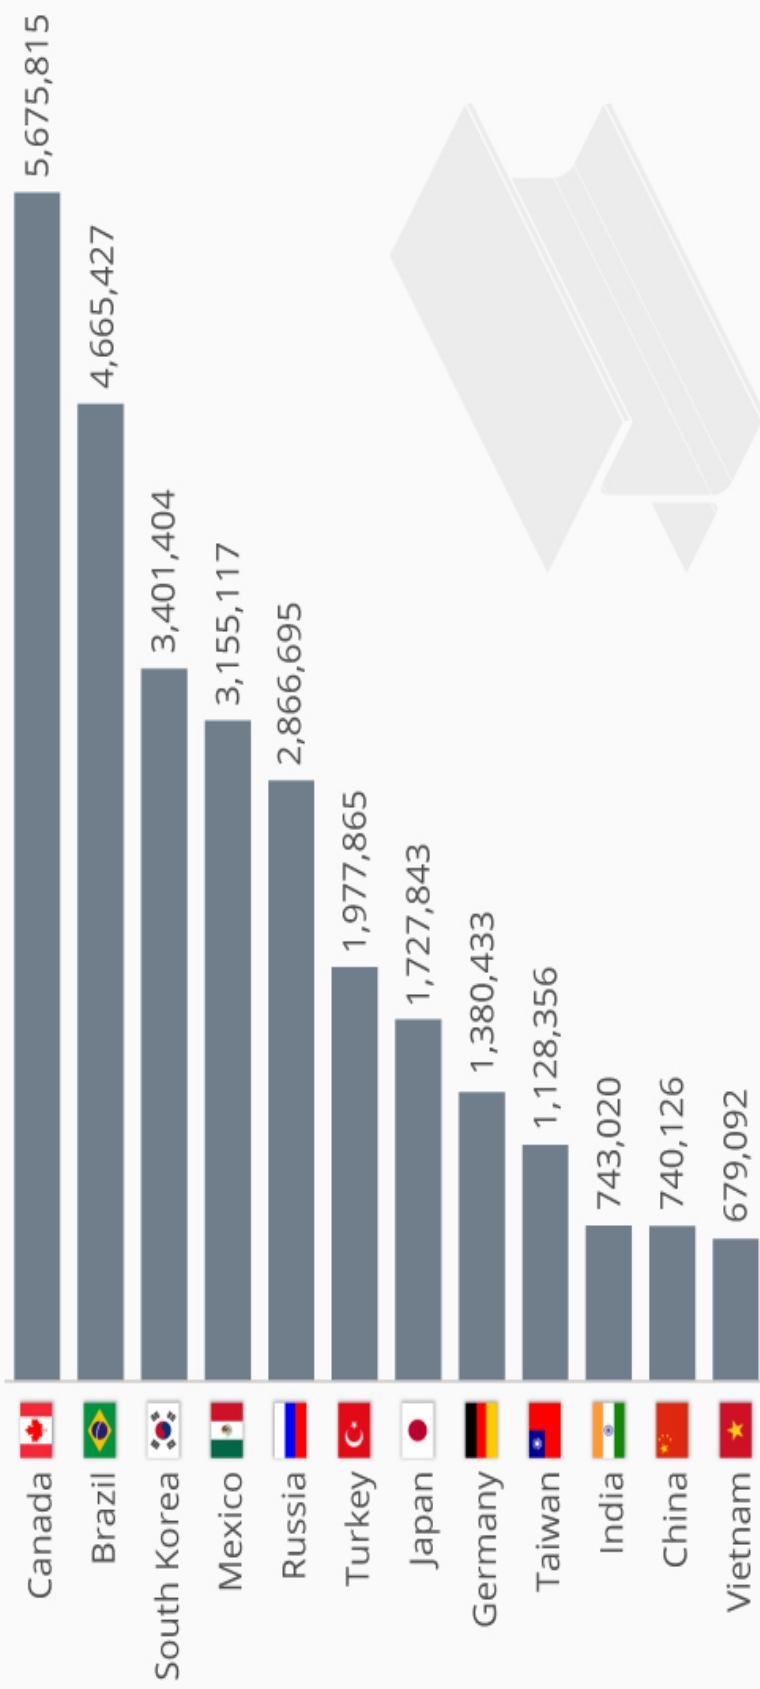

- Decades of neglect in the steel industry
- Original tariff system included everybody – then almost everybody was exempted. Then they were not. Today Brazil, Argentina and South Korea have exemptions. Canada and Mexico likely are next and so is Europe
- Steel makers – once bit, twice shy
- Manufacturers feeling pinch already unless they could use the 232 exemptions
- China is not a factor as far as exporting to US. They sell aggressively to everybody else and that pushes other nations to sell aggressively to the US

# Latin American Divergence

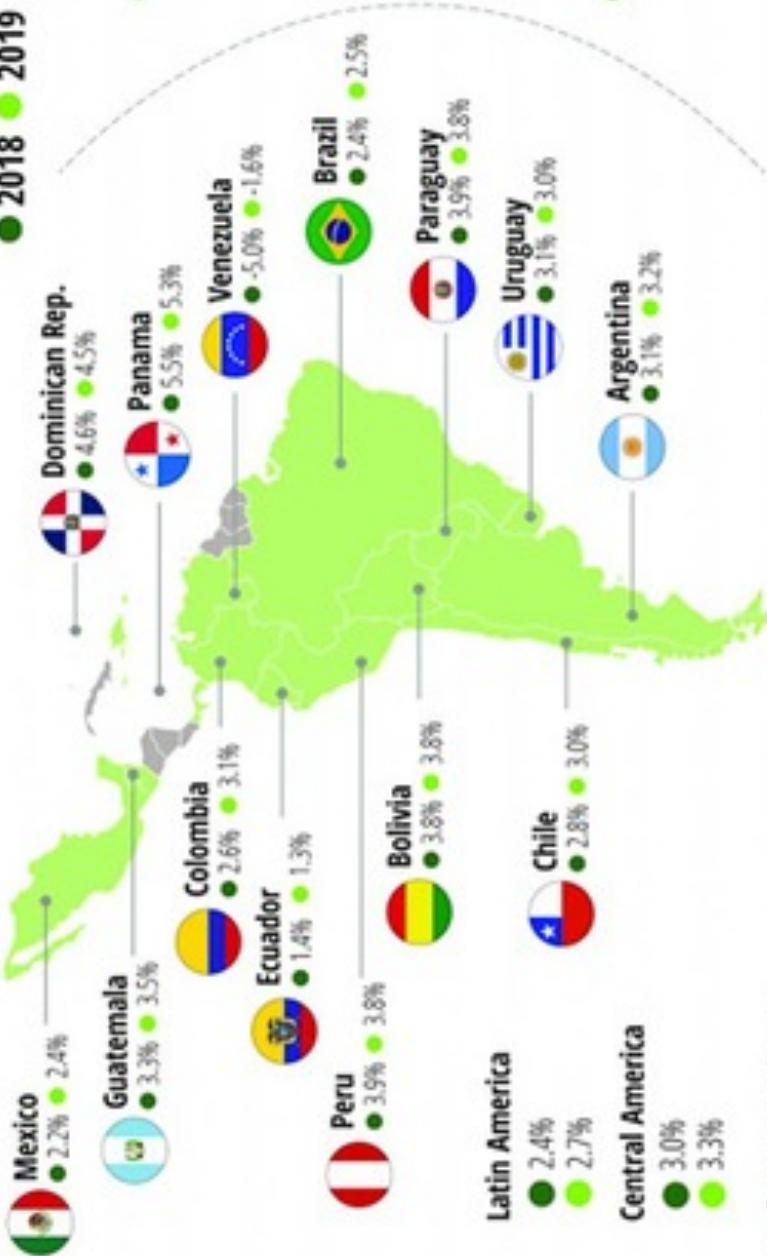

ARMADA

## Latin America 2018 & 2019 Growth Forecasts

Analysts expect GDP to rise in many countries in the coming years, but ongoing uncertainty surrounding elections continues to weigh on their projections.

● 2018 ● 2019

- The economic recovery in **Latin America** will be gradual, and the 2018 outlook is clouded by uncertainty related to the upcoming elections in various countries.

- Growth prospects for **Central America** & the **Caribbean** remain depressed due to fiscal imbalances and acute political noise.

- **Panama** and the **Dominican Republic** will be the fastest growing economies in 2018. **Venezuela** will continue to suffer with growth projected at -0.5%.

## FOCUS ECONOMICS

[www.focus-economics.com](http://www.focus-economics.com)  
FocusEconomics Consensus Forecast Latin America, December 2017

# Five Issues to Worry About

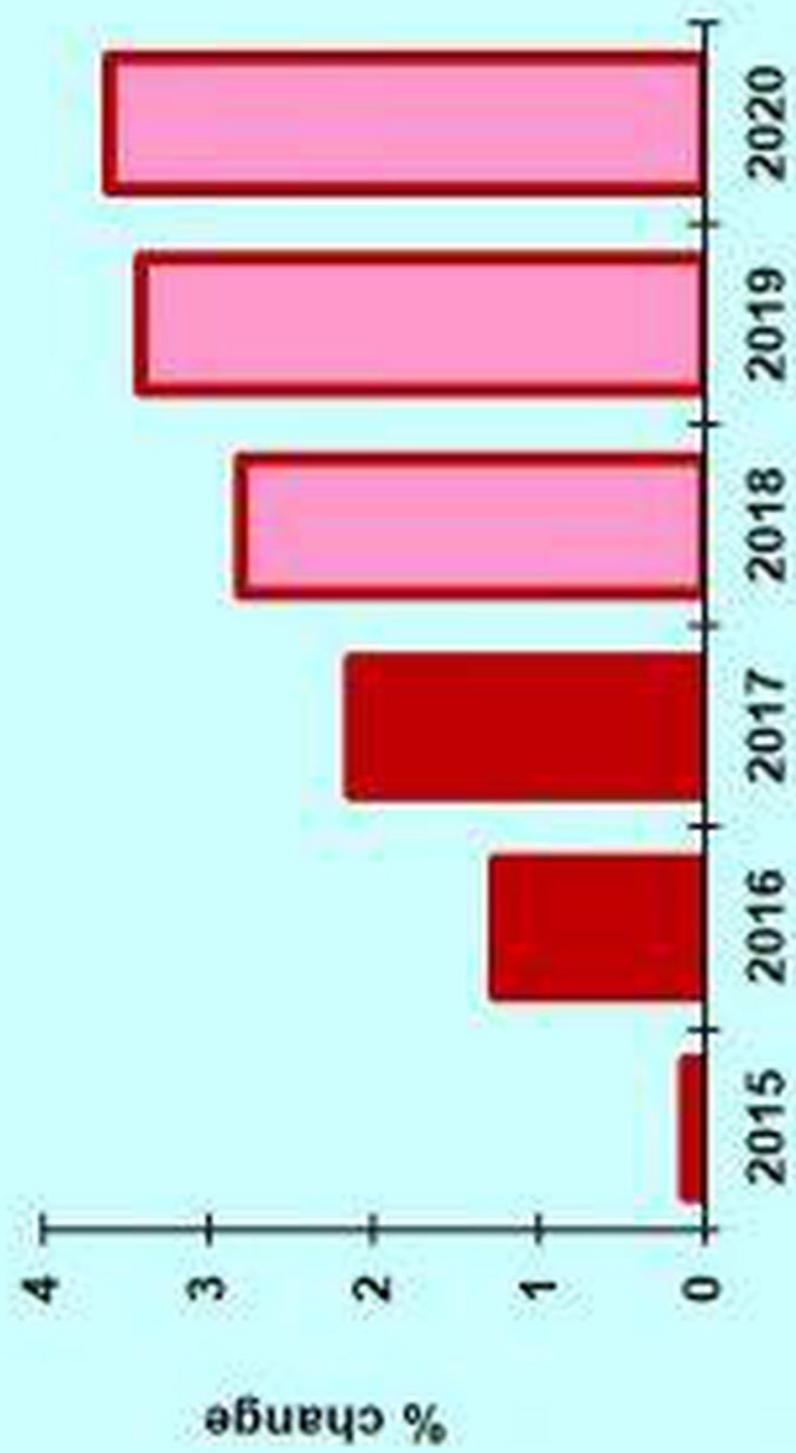

- **Return of Inflation and Likely Fed Reaction**
  - Commodities and Labor
  - Importance of FOMC personalities
- **Trade War Impact**
  - China – tariffs, structural reform and global growth
  - Drift away from Europe
- **Labor Shortage**
  - Hiring and productivity
- **Political Stalemate**
  - Shutdown impact
  - Neglecting big issues – coming off “sugar rush”
- **Consumer Confidence and Retail Shifts**
  - On-line vs. brick and mortar

# People Needed – Now!!

ARMADA

## Manufacturing Facts

9th largest economy in the world contributing \$2.18 trillion to the U.S. economy in 2016.

3,749 firms have more than 500 employees.

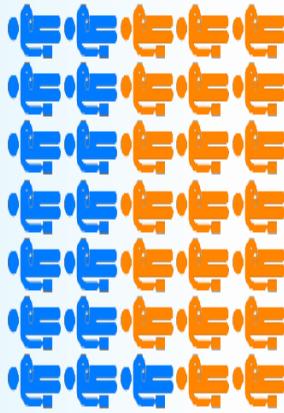

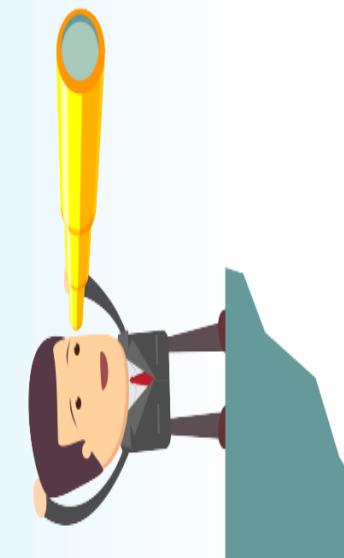

248,152 firms have less than 500 employees.

Out of those 248,152 firms, 186,114 have less than 20 employees.

80%

of manufacturers reported a moderate or serious shortage for qualified applicants.

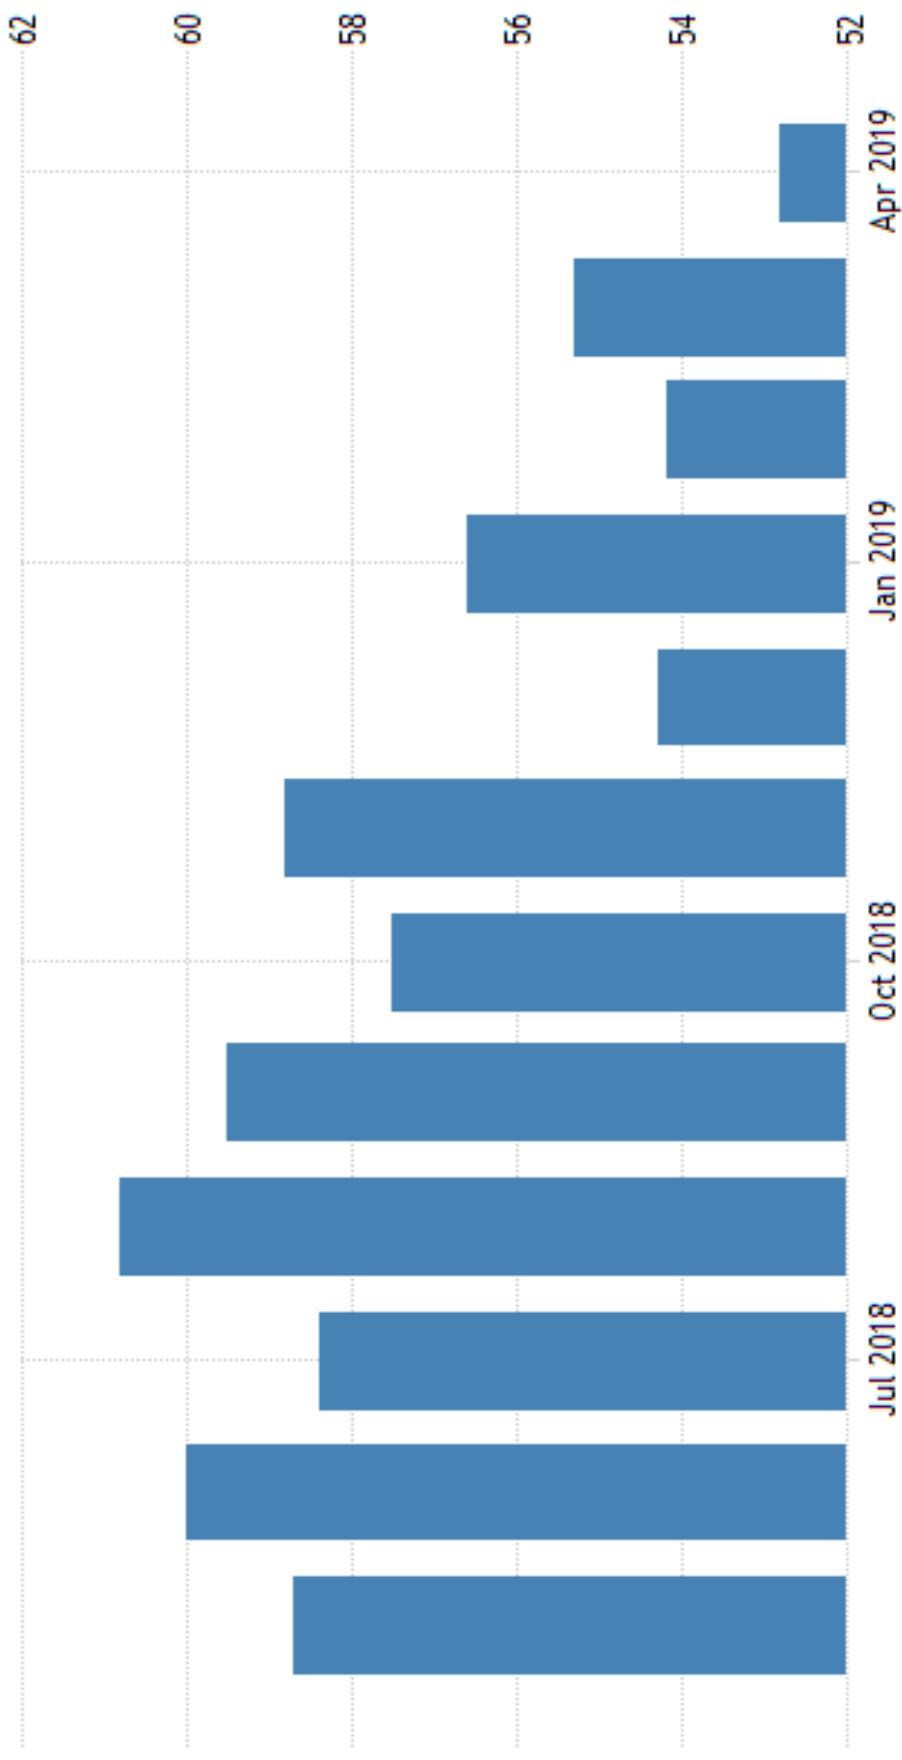

With 3.5 million manufacturing jobs needed to be filled, 2 million are expected to stay unfilled due to a skills gap.
